

Improve collections with better banking data.

SPOT Verified Bank Locator offers the most accurate data available on a consumer's current banking information in order to improve collections with smarter data for asset location.

The service leverages multiple sources of data reported to and aggregated by MicroBilt to identify ABA Routing and Bank Account Numbers associated to a submitted individual.

Each ABA routing and account number located is put through a series of verification and validation processes to confirm the bank account is legitimate and currently open.

Used by leading collection firms, debt buyers and agencies, SPOT Verified Bank Locator's extensive verification process includes more sources and cross-checks than any competitive offering. This precision view ensures accurate account status and can predict account performance.

Key Features and Functionality

Most extensive coverage in the industry containing **billions of ABA and account number transactions** reported from loan applications, retail purchases, financial institutions, and other ACH/check transactions.

Unique proprietary data directly reported to MicroBilt from ACH processors, retailers, collection agencies and more.
