

We find. We verify. You collect.

What do you get when you take the most effective place-of-employment database in the industry and add verified results? You get a tool which will greatly increase your skip tracing effectiveness, while slashing the amount of time and money spent.

SPOT is the most effective POE-locator in the industry, with a hit rate 300% - 400% higher than standard searches.

SPOT Verified POE does the extra leg-work to confirm that POE hits and phone numbers are accurate and up-to-date. We work every file daily for 30 days. With verification in hand, you'll be able to contact employers with confidence, assured that the debtor currently works there.

MicroBilt's verification team is highly trained and experienced in using our proprietary data to facilitate additional manual investigations as needed using social media and other resources to locate and verify your subject's employment.

This combination of data and expertise makes SPOT Verified POE the perfect solution for banks, collection agencies, collection attorneys, debt buyers, and any industry with collections needs. Spend less time searching for place of employment, and more time collecting.
