

Business Credentialing & Compliance

The industry leading business credit report

An effective way to get both credit history and equipment financing information on a specific company.

Available: Web Based Batch API

What does it do?

Offers six business information reports, that leverage D&B's proprietary data. These include:

Business Information Report

D&B's proprietary credit Rating and PAYDEX to help you make business-to-business lending decisions.

Background Report

A summary of basic business information on a company.

Comprehensive Report

In-depth evaluation of a company's financial stability.

Credit Scoring Report

A predictive analysis of a company's delinquency risk for the next 12 months.

Payment Analysis Report

In-depth historical analysis of a company's payment performance.

Supplier Evaluation Report

An easy-to-understand risk score to help you determine the level of engagement you might want with a U.S. supplier.

What is it used for?

To research and evaluate potential business relationships with other companies.
