Skip tracing and identity verification has never been easier

A comprehensive skip tracing tool for locating individuals and getting critical identity and contact information.

Available: ✓ Web Based ✓ Batch ✓ API
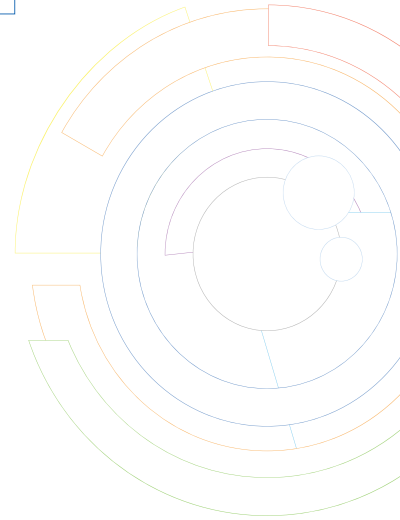

What does it do?

Helps you locate and identify the personal history of an individual. Data sources queried include millions of public records including over 960 million registered land and wireless phone numbers, Credit Bureau Header files and proprietary alternative consumer credit data.

The majority of the U.S. adult population can be found by the EPS service and report includes:

- Name
- AKA's
- Date of birth
- Social Security Number and validation
- Current address
- Address Summary containing previous addresses with details such as address validation, reporting dates, delivery information accompanied by USPS Barcodes and phone numbers associated with address
- Phone Summary with status, listing and phone type, carrier name and last reported date
- Date of death and Death Master File verification
- Identification of high-risk profile
- Summary header of reported and verified matches
- Data reporting dates

What is it used for?

Used by collections and recovery professionals for cost-effective skip tracing.
