MVR

Know an applicant's driving history before they get behind the wheel for you

Conducts a search across motor vehicle records in all 50 states to identify driving violations of an applicant.

Available: ✓ Web Based   ✓ Batch   ○ API

What does it do?

Offers a real-time search of the motor vehicle record databases maintained by each State in the U.S and returns helpful data in understanding an applicants licensing and driving history.

- Including:
- Name
- Address and county
- Social Security Number
- Date of birth
- Race
- Remarks
- Violations
- License issue and expiration date
- License class, type, and status
- Hair and eye color
- Height

What is it used for?

Used to screen employees for transportation-related work including delivery and shipping service, etc. It provides necessary background on an applicant's driving history to prevent costly litigation for the company that can be associated with hiring bad or higher-risk drivers.
