

Credit Decisioning & Verification

Accurate vehicle pricing at your fingertips

The National Automobile Dealer Association (NADA) Vehicle Pricing Report is used to obtain information for assessing a specific vehicle's value.

Available: Web Based Batch API

What does it do?

Searches the National Automobile Dealer Association database using VIN, Vehicle Make/Model, Year, Body Type, Location and Mileage to return the following information:

- MSRP (manufacturer's suggested retail price)
- Retail values
- Trade-in value
- Loan value
- Options and equipment adjustment
- Mileage adjustment
- Current estimated value

What is it used for?

Delivers important information to auto dealers during the sales and underwriting process to support used vehicle buying and selling decisions.
