

Business Credentialing & Compliance

Professional License  
Verification

## The quickest way to confirm someone's professional license qualifications

Conduct a search of over 400 sources of professional licensing, including industry organizations and State agencies across all 50 States and U.S. Territories.

Available:  Web Based  Batch  API

### What does it do?

Allows users to conduct a search of over 400 sources of professional licensing, including industry organizations and State agencies across all 50 States and U.S. Territories. Licensing for business, medical, legal, financial services, collections, and other types of professionals and businesses may be confirmed on current and former license filings. The Professional License report will return the following information as available from each source:

- Name and address
- Profession
- License or Registration Number
- Dates of issuance and expiration
- Current license status
- Associated disciplinary actions
- Any additional qualifications

### What is it used for?

Used by businesses and foundations to prescreen potential hires to minimize exposure to fraud or liability associated with hiring employees who require licensure.
